-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 May 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Drawings

1. The drawings are objected to because Figure 1, item 60, Figure 2, item 26a, and Figures 5, 7-9 and 11-13, item 26a or 26b requires descriptive wording (37 CFR 1.83(a)). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2666

Claims 1-60 are rejected under 35 U.S.C. 102(e) as being anticipated by Oran (US 6,275,574).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e).

This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

2. Regarding claim 1, 6-12, 16-21, 24-28, 33-36, 43-48, 51-56 and 59-60, Oran discloses a method of routing calls using dialed number (digit) partitions (fig. 2a; fig. 3, item 32; col. 5, lines 40-50). The method comprises receiving a call request at a call manager (fig. 1, item 18 or 28) from a first device coupled to a packet based network (fig. 1), accessing a dialing partition table based on a partition search space associated with the first device (col. 5, lines 40-50), determining a routing target associated with a telephone number (col. 5, lines 40-46), and communicating the call request to the routing target (col. 6, lines 56-67). Further regarding claim 45-48 and 51-52, the method is inherently performed using software (fig. 1, item 18, 26 and 28).

3. Regarding claims 2-5 and 29-32, non-IP telephony devices (fig. 1, item 14) utilizing a gateway (item 18) and IP telephony devices (item 24) are in the network.

4. Regarding claims 13-15, the dialing tables are for different organizations (fig. 5, item 62 and 64; col. 5, lines 41-45).

5. Regarding claims 22-23, 37-42, 49-50 and 57-58, a best phone number match is found for routing (col. 6, lines 56-67).

Art Unit: 2666

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haga (US 6,366,576; figs. 2-5), Pickett et al. (US 6,498,791; figs. 38-42 and 47), and Hakim et al. (US 6,614,708; col. 10, lines 16-45) each discloses transmitting voice information over a packet network via gateways having a dialing plan.
